Installation Instructions

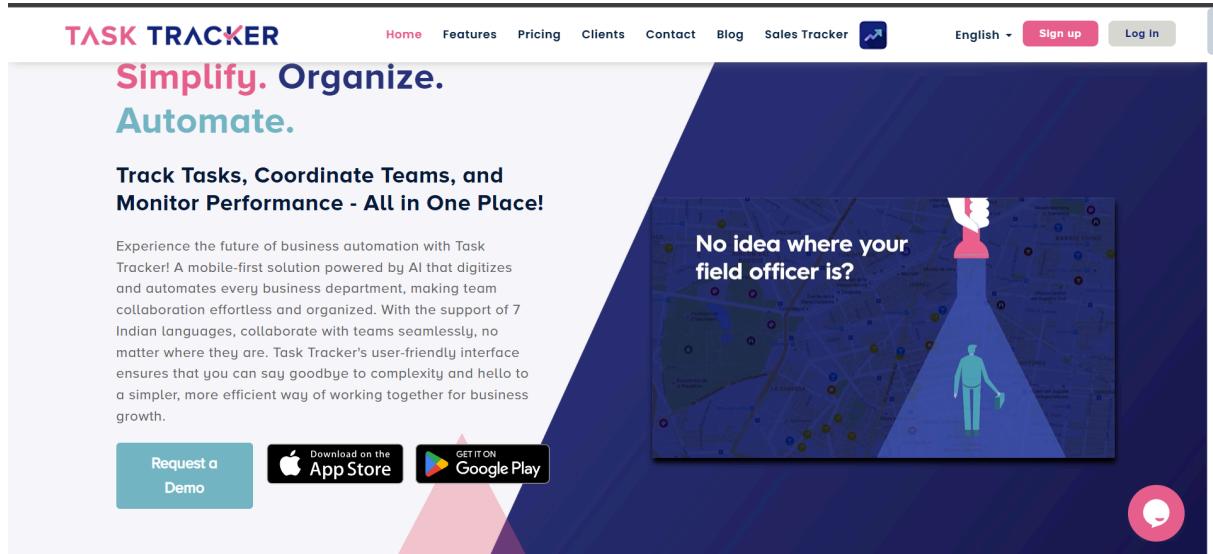

Let's explore all the necessary instructions you need to take while downloading the application on your desktops and mobile phones.

Step 1: Download TaskTracker

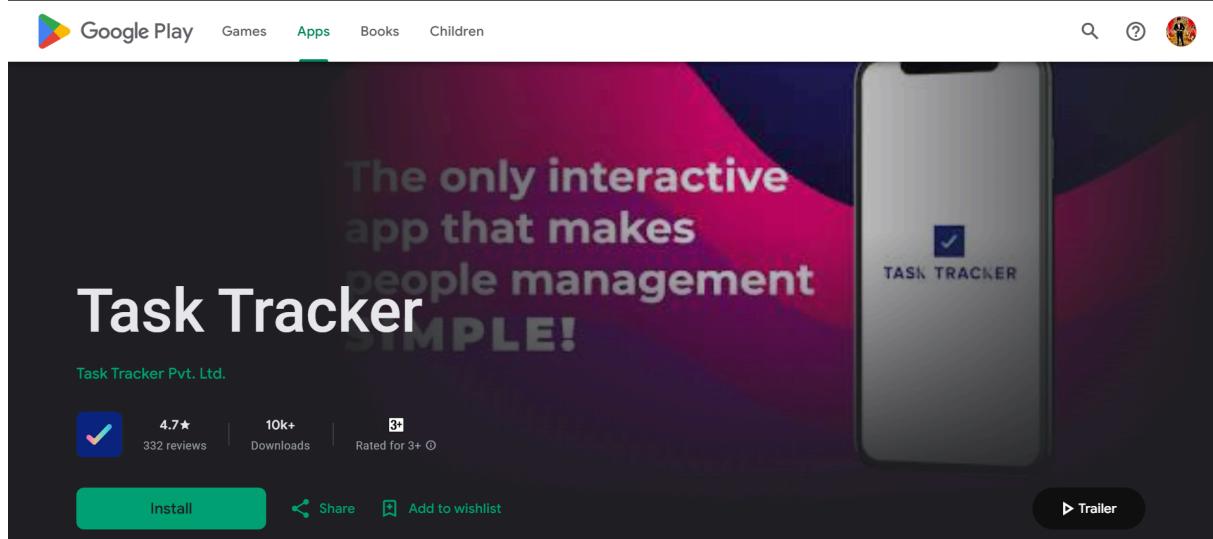

- Visit the TaskTracker website or open your device's app store.

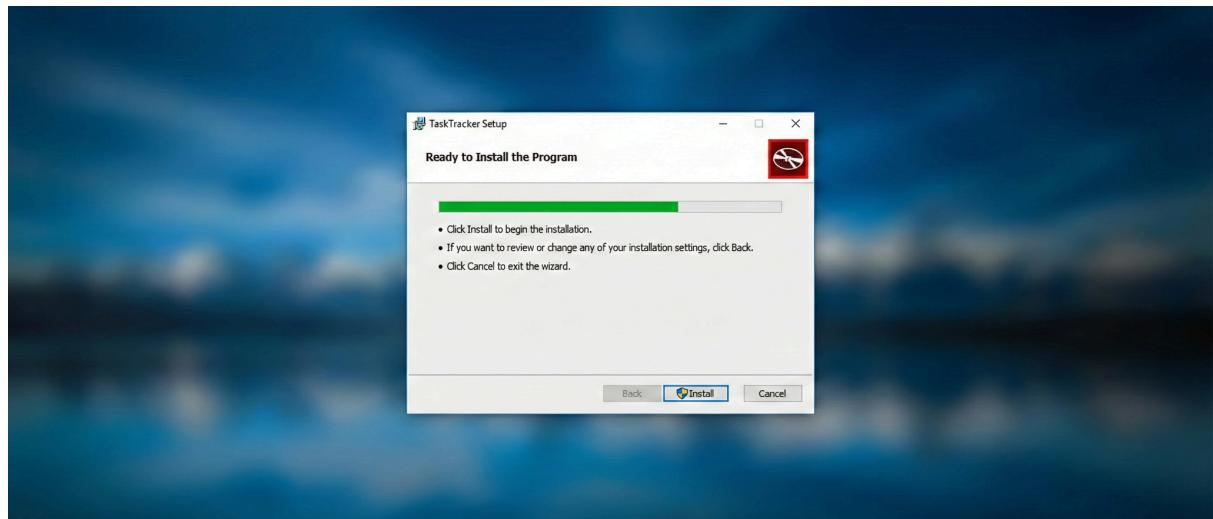

- Choose your platform: **Windows, macOS.**

- Click or tap Download / Install.

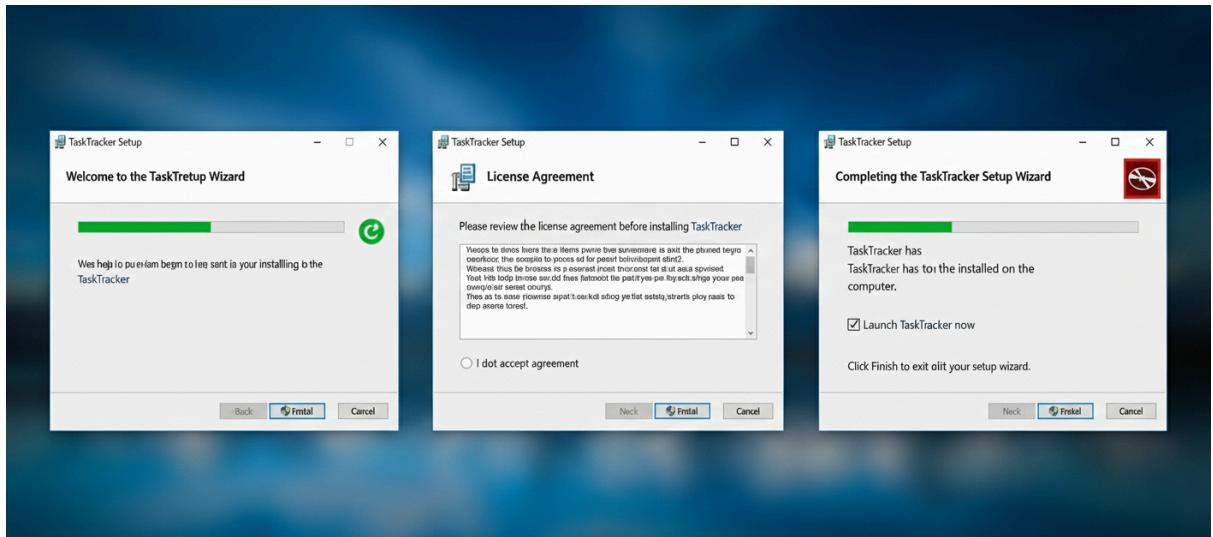

- Wait for the download to complete.

Step 2: Install TaskTracker

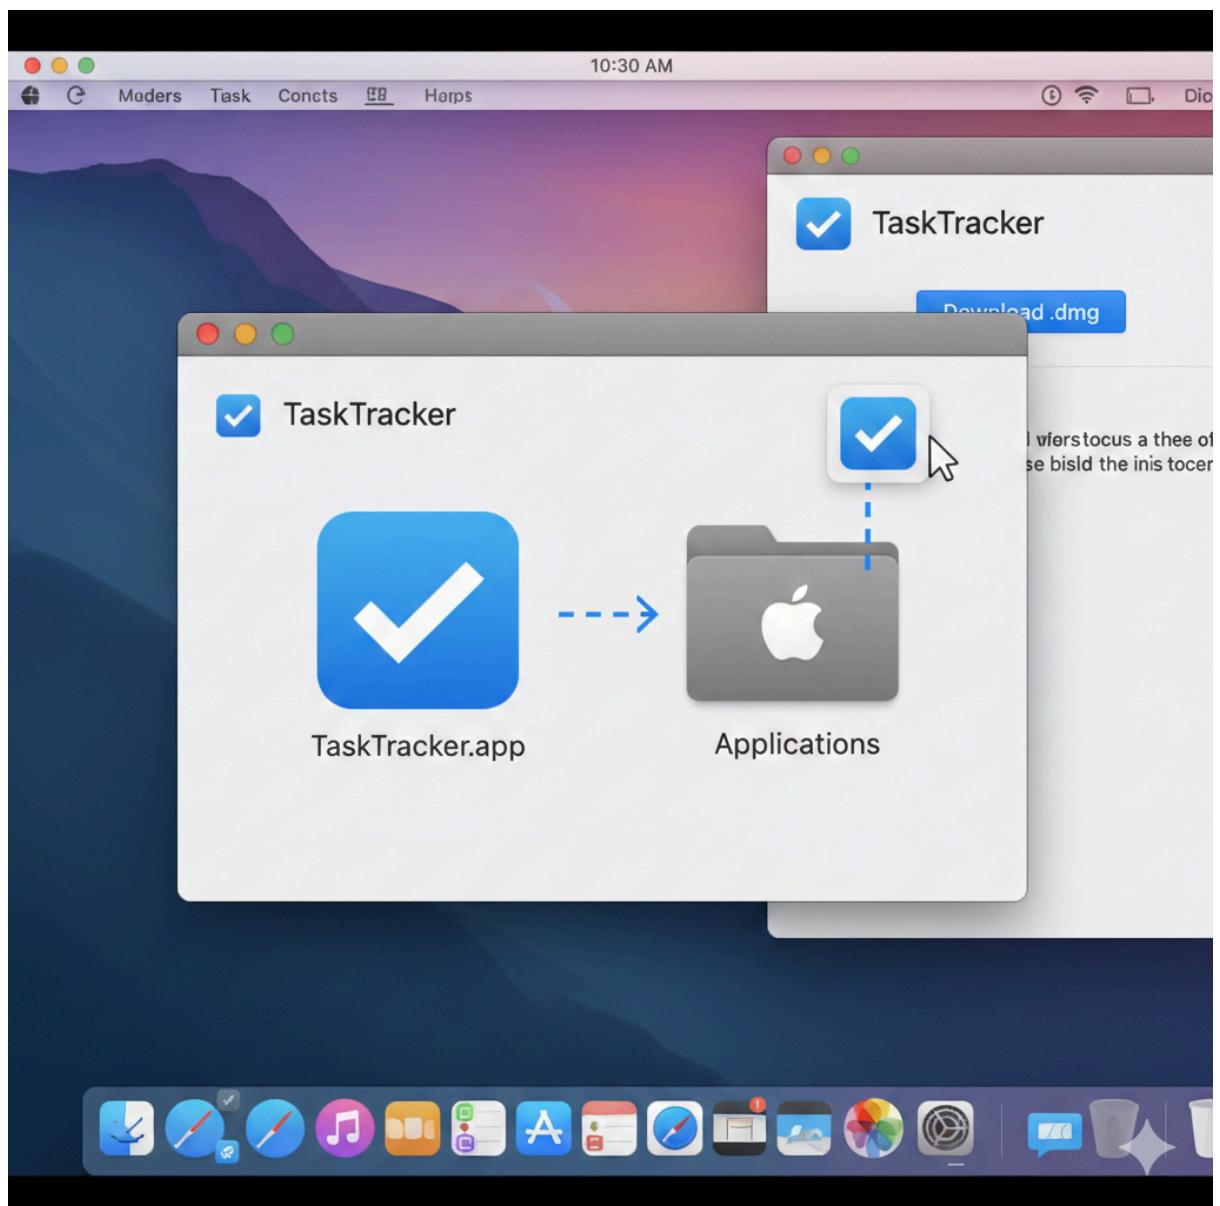

Windows

- Open the downloaded .exe file.
- Click **Next > Accept License Agreement > Click Install.**
- Click **Finish** when installation completes.

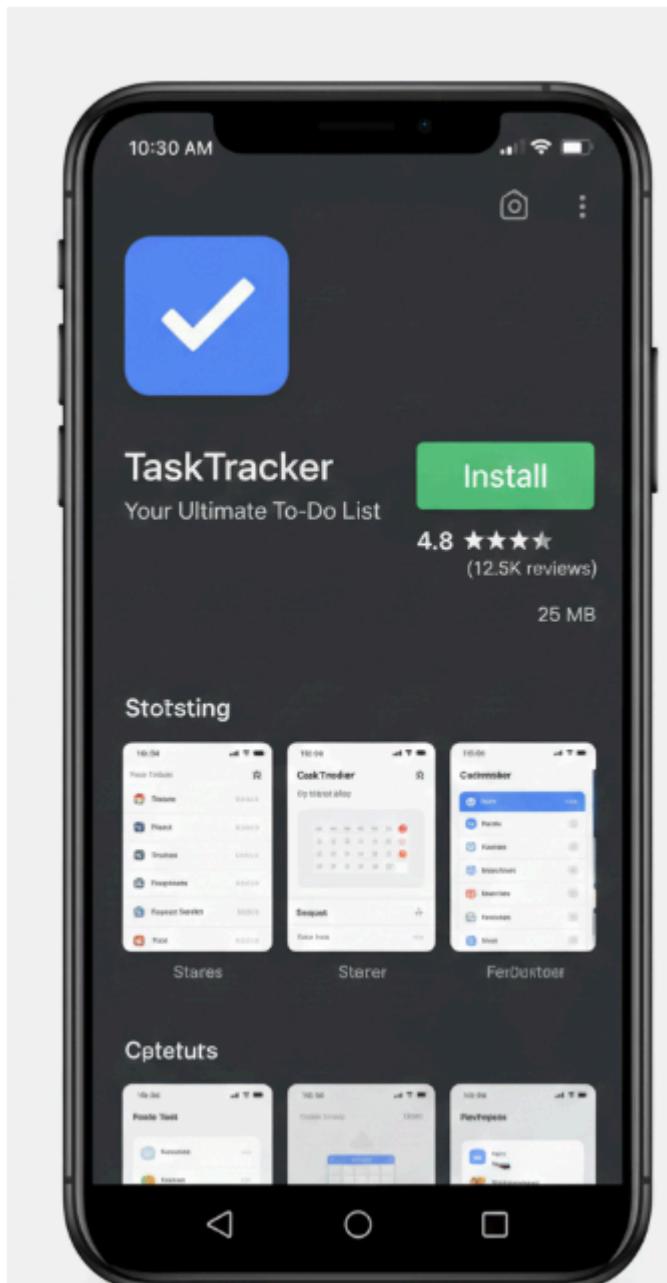

macOS

- Open the .dmg file.
- Drag TaskTracker into the **Applications** folder.
- Open the app and allow permissions if prompted.

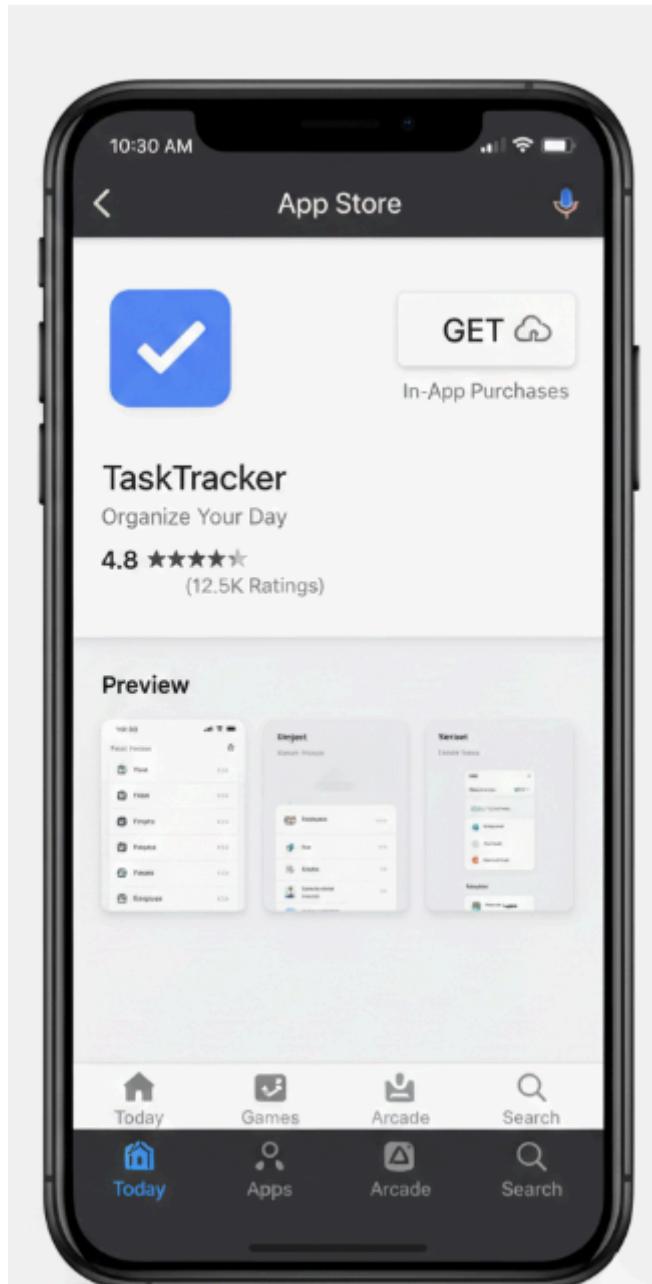

Android

- Open the **Google Play Store**.
- Search for **TaskTracker**.
- Tap **Install**, then tap **Open** once installed.

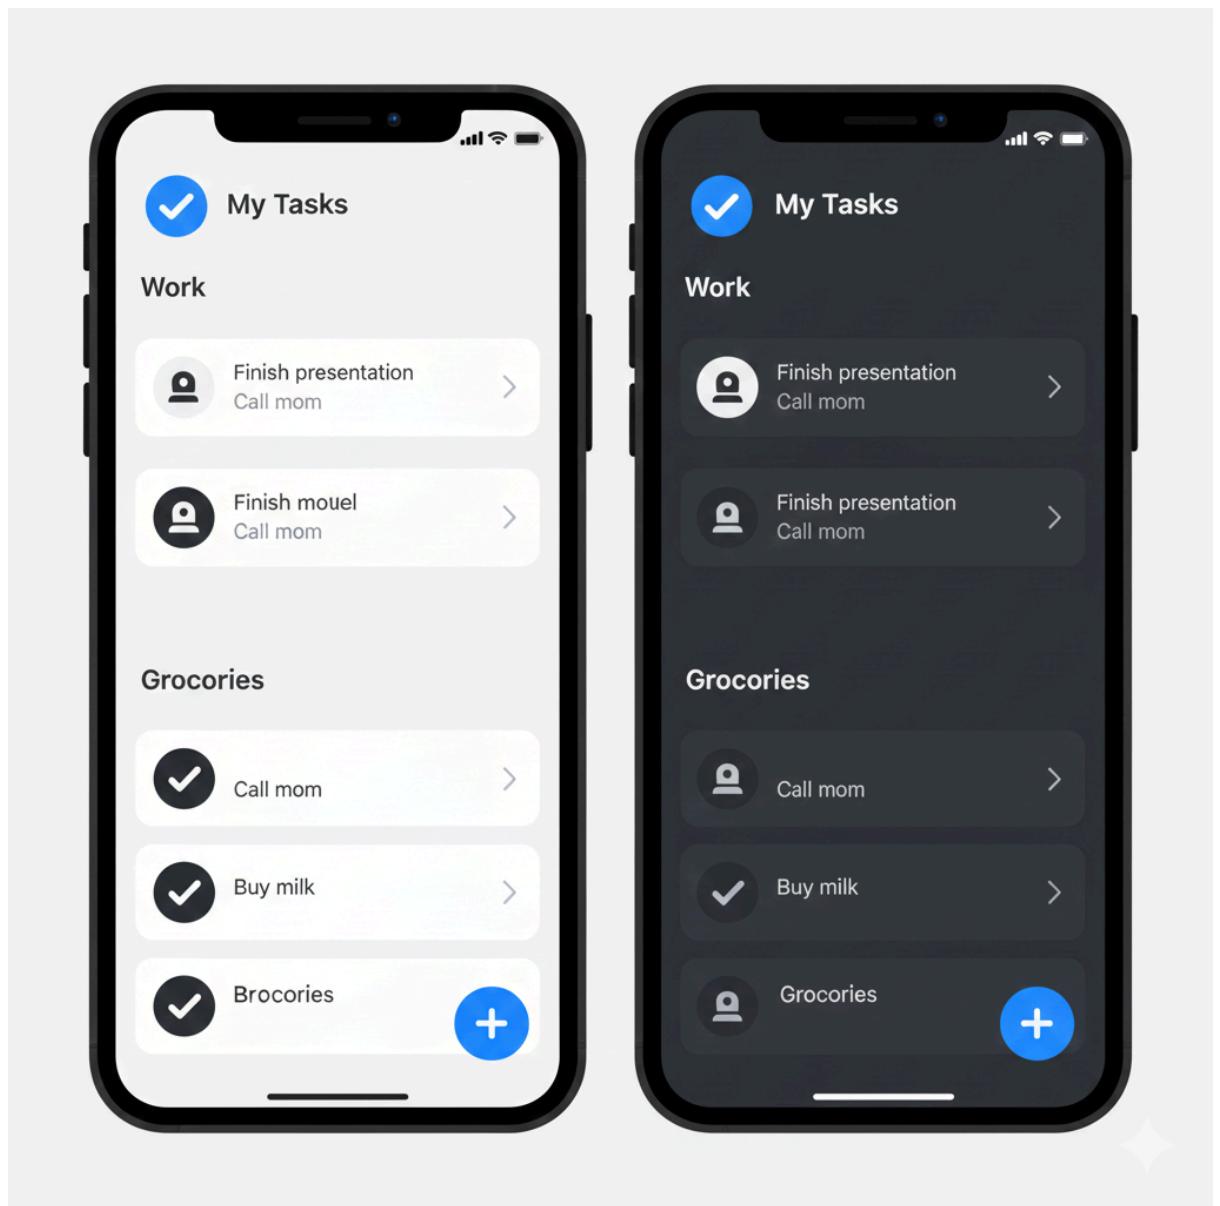

iOS (iPhone/iPad)

- Open the **Apple App Store**.
- Search for **TaskTracker**.
- Tap **Get** > Authenticate if required.
- Tap **Open**.

Step 3: Launch and Set Up TaskTracker

- Open TaskTracker from your device.
- Sign up or log in.
- Choose a theme (light/dark), enable notifications.
- Start creating and managing your tasks.

Key Features

After Installation, let us explore all the features TaskTracker provides:

- **Easy Task Creation:** Add tasks quickly with titles, descriptions, due dates, priority levels, and categories for better organization.
- **Smart Reminders:** Receive timely reminders before deadlines and get notified about overdue tasks so you never miss anything important.
- **Categories & Tags:** Organize your tasks using custom categories (Work, Personal, Study, etc.) and add tags for easier filtering.
- **Cloud Sync:** Access all your tasks across multiple devices with real-time synchronization.
- **Dashboard Overview:** View your daily tasks, priorities, and overall progress with the help of a user-friendly dashboard.

How to Create a New Task

Creating a task in TaskTracker is quick and simple. Follow these easy steps to add your first task:

1. Tap the Plus Button:

- On your phone, the big blue “+” button is at the bottom right.
- On your computer, it appears at the top left.

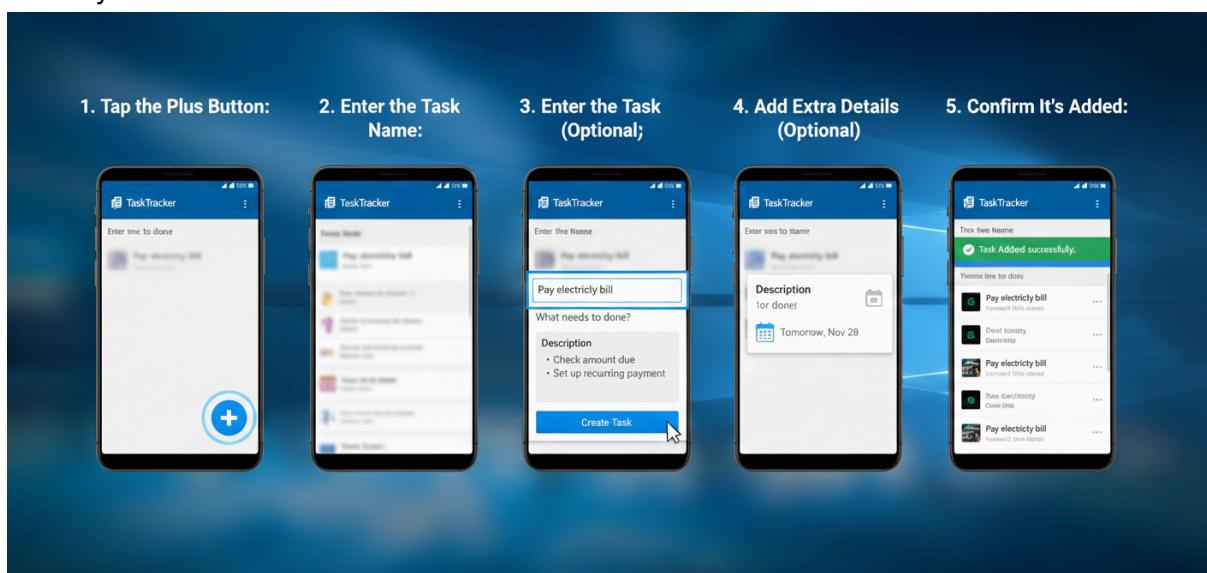

2. Enter the Task Name: A small window will open. Click or tap the box that says “What needs to be done?” and type your task (example: “Pay electricity bill”).

3. Add Extra Details (Optional): You can include more information if needed:

- **Description:** Add notes or checklist items.
- **Date:** Tap the calendar icon to pick a due date.

4. Save Your Task: Tap or click “Create Task” to save it.

5. Confirm It's Added: A message saying “Task Added” will appear, and you'll see your new task in your task list.

Troubleshooting Common Issues

While working, the app may not work as expected. Let us explore the common issues that arise and how to resolve these issues:

1. Issue: Tasks are not showing on the phone or laptop.

Reason: This usually occurs when the internet is slow or turned off.

How to Fix:

- Check if your internet is working.
- Close the application and open it again.
- If the tasks still don't appear, log out and log back in.

2. Issue: I am not getting reminders or notifications

Reason: Permission for displaying the reminder and notifications is closed

How to Fix:

- **iPhone:** Go to Settings > Notifications > TaskTracker > Turn on Allow Notifications.

- **Android:** Go to Settings > Apps > TaskTracker > Turn on Notifications.

3. Issue: The app feels slow or laggy

Reason: Using an older version of TaskTracker.

How to Fix:

- Go to the App Store, Play Store, or website.
- Look for the Update button and install the latest version.
- Updating usually makes the app faster and smoother.

Troubleshooting Guide: User Cannot Save Tasks

A user reports that they cannot save a task. They tap **Save**, but nothing happens, or an error appears. This issue is usually caused by internet problems, insufficient device storage, or an old app version.

Step-by-Step Guide for the User

Let us look at the steps needed to resolve the problem

Step 1: Check Internet Connection

TaskTracker needs the internet to save tasks.

Ask the user to:

- Try to open any website on a laptop or mobile phone (like google.com).
- If the website does not load or respond, the issue is the internet.
- Ask the user to switch to another network or connect to Wi-Fi.

Step 2: Restart the App

Try to restart the application, which can help solve the problem of not saving the task:

- **On Mobile:** Close the app completely and open it again.
- **On the Computer:** Close the window and relaunch TaskTracker.
- Try saving the task again.

Step 3: Update the App

Try to update the applications an older version does not work properly:

Ask the user to:

- Open the App Store / Play Store / TaskTracker Website
- Check if an update is available.
- Install the latest version of the application.
- After updating, open the app, and try saving again

Step 4: Check Device Storage

If the phone or computer storage is full, new tasks may not save.

Ask the user to:

- Check space in Settings > Storage
- Delete a few files/apps if needed.
- Try saving the task again.

Step 5: Restart the Device

If nothing works, restarting the device can help resolve the temporary errors.

Ask the user to:

- Restart the phone or computer.
- Open TaskTracker again.
- Try saving the task.

Information Needed for Support Team

If the above-mentioned steps do not fix it, please ask the user for this info so our support team can look at it:

- Screenshot of the error.
- Device type (Windows/Mac/Android/iOS).
- App version.
- OS version.
- The steps the user followed before the error.
- Whether the issue occurs on all devices.

Frequently Asked Questions (FAQ)

Q1: Do I need a credit card to start the free trial?

A: No. You can begin the 14-day trial without entering payment details.

Q2: Will my tasks remain saved after the trial ends?

A: Yes. All your tasks and settings remain securely stored even after the trial expires.

Q3: Can I use TaskTracker on mobile and desktop?

A: Yes. TaskTracker works on Windows, macOS, Android, and iOS with full cloud sync.
